Who was Tutankhamun?

He was a boy Pharaoh from Ancient Egypt.

When was he alive?

He was born in 1346 BC

How did Tutankhamun die?

We don't actually know. There are two possible reasons

1. He might have been murdered by his advisor who became Pharaoh after he died.
2. He might have broken his leg and died from complications caused by that.

Who discovered his tomb?

Howard Carter was the archaeologist. Lord Carnarvon paid for the expedition and dig.

When was the tomb discovered?

1922

What was inside his tomb?

Over 3000 treasures. They also found the mummy of Tutankhamun.
