

## Science - Summer 2 Week 2

### Plants

This week we are going to focus on plants.

Plants are living organisms that cover much of the land of planet Earth. You see them everywhere. They include grass, trees, flowers, bushes, ferns, mosses, and more. There are over 200,000 identified plant species and the list is growing all the time.

The fastest growing woody plant in the world is bamboo. Bamboo can grow up to 35 inches in just one day!

The largest flower in the world is the Rafflesia which can grow to over three feet in diameter.

#### Tasks

##### Year 3 and 4
