

## Model Text Tuesday

Sub-heading and colon

Adverb

### **Method:**

Time sequence words

1. Firstly, wash the body thoroughly.
2. After that, carefully slide a thin hook up the nose.
3. Briskly, pull the brains out through the nostrils.
4. Next, make a small cut and remove the lungs, kidney, liver and intestines before putting them into canopic jars. Leave the heart inside because this is important for the after life.
5. Then cover the body evenly with salt and leave for 40 days.
6. When the body is dry, remove the salt and fill the mummy with sawdust.
7. Finally, gently wrap the mummy in bandages.
