

## Mother Nature - Lesson 2

### Lesson 1 Learning objectives:

To explore the work of Andy Goldsworthy.

To explore and develop ideas about the materials and processes used to create sculptures

### Warm your brain up!

What can you remember about Andy Goldsworthy from the last lesson? Write down 5 facts.

### The facts you need!

#### 1) Watch this clip again from last lesson:

<https://www.bbc.co.uk/bitesize/clips/zs87tfr>

- Andy takes lots of photos of his work at different stages.  
He says " Each work grows, stays, decays."

### Your Creative Task...

- 1) Today you are going to go on a nature walk! You could go to some woods or a park near your house (or maybe your garden if it is big enough!) Take a bag with you! You are going to need to collect as many natural things as you can - leaves, stones, pine cones, flowers, bark, twigs, grass....anything you can find! Try and get a variety of things. Look for different shapes, sizes and colours.
- 2) Now using the objects you found, make a piece of art work on the ground/grass/table or piece of paper. Just like Andy Goldsworthy!! Look at where and how you place your things. Is it a pattern? Is it random?
- 3) Take a photo and tweet your work! We can't wait to see your amazing creations.

Here are some examples to inspire you!
