

## The Implementation of the 5 Levers

### Lever 5 Space

We aim to give children the space to be, to rediscover self and to find their voice. We recognise the importance of exploration and to compensate for lost opportunities.

To give children space before returning to the classroom, we will -

- Plan for school trips as long as these can be completed safely.

To give children space on returning to school -

- Regularly plan grounding activities, circle time and calming activities into timetable.
- Use activities from '101 Games for Social Skills' to develop communication skills.
- End each day with hope by sharing good news, discussing what went well and ending with a class prayer.
- To use an emotions chart for children to voice their concerns.
- Provide opportunities for their voice to be heard through house captain election, school council election and subsequent work.
